...duction of denim by ... people as their wear- ... men fashion and the ... climate of casual living ... keeps denim soaring in popularity.

The fading quality of indigo is cherished by denim lovers. So much so that factory-produced faded looks have been a recent development. For those who can't wait for sand, sun and general wear to fade "regular" blue denims, **American Fabrics and Fashions** magazine suggests a bleach bath: Dilute a quarter to a half gallon of bleach in a tub of warm water, stir well and immerse the denim clothing for half an hour. After soaking, machine wash through a regular cycle.

Teenagers want the well-worn look immediately. Let the washing machine take the onus off new jeans by putting them through two or three complete launderings. Use fabric softener to help remove stiffness.

In general, denims are durable and go through countless launderings. However, the latest fashion picture includes decorative treatments such as rhinestones, nailhead and embroidery. Be sure to check care labels for washing instructions. Some fabric will take rough and tumble wearing and washing, but some of the fashion accents may require more gently treatment.

For now and moving into fall, the Western look is important with a wide variety of yoke treatments on shirts and jackets. Coordinates also include fitted denim vests and black with bright detail stitching in shrunken up. Ins pants, both very high and very low waistbands abound. Leg widths are most often seen in a medium range.

It's the year for denim!
